@eshaaldev

Day 3

CSS

Box Model

Introduction

CSS Box model is the invisible box around every element.

It describes how elements are displayed and spaced on the page.

@eshaaldev

How it looks

Box-Sizing

It controls how the total width/height is calculated.

```
box-sizing: content-box; // default
box-sizing: border-box;  // recommended
```

✅ `border-box` : Width/height includes padding + border

⛔ `content-box` : Width is *just* the content, and padding/border are added outside

Always use `border-box` for simpler layouts!

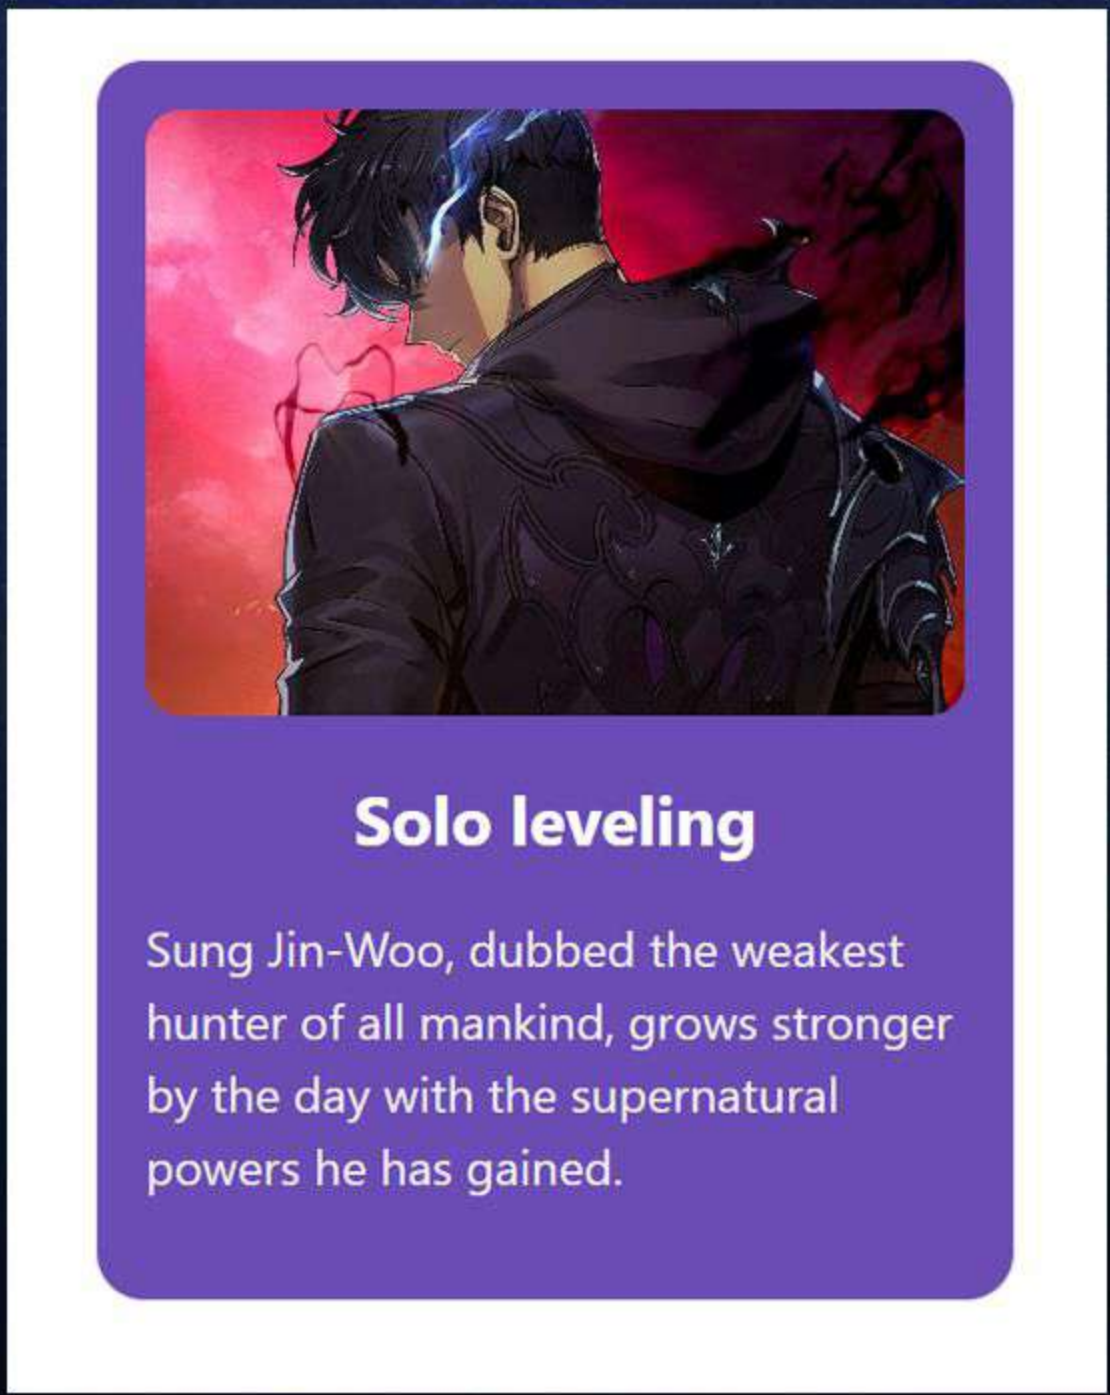
@eshaaldev

Elements

Property	Description	Use Case	Ways to Write	Syntax Example
Content	The area where text, images, or other elements are displayed.	Setting the size of the actual content area.	Use `width` and `height`.	`width: 300px;` `height: 150px;`
Padding	Space between content and border — inside the element.	Adds breathing room inside an element; used for spacing text or elements away from edges.	- `padding: 20px;` - `padding: 10px 20px;` - Individual sides: `padding-top`, `padding-left`, etc.	`padding: 10px 20px;` `padding-left: 15px;`
Border	The outline around the padding and content area.	Used to frame elements, create outlines, or design card-like layouts.	- `border: 1px solid black;` - Specific sides: `border-top`, `border-left`, etc.	`border: 2px dashed #333;` `border-radius: 8px;`
Margin	Space outside the element — between this element and others.	Used to create gaps between elements.	- `margin: 20px;` - `margin: 10px 20px;` - Individual sides: `margin-bottom`, `margin-right`, etc.	`margin: 0 auto;` `margin: 10px 15px 5px 0;`

Mini Project

Lets make this card by applying all the box model concepts.



@eshaaldev

HTML

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <title>Card</title>
    <link rel="stylesheet"
    href="styles.css">
</head>
<body>
    <div class="card">
        <img
src="https://static0.gamerantimages.com/wordpress/wp-content/uploads/2(
alt="img">
        <h1>Solo leveling</h1>
        <p>Sung Jin-Woo, dubbed the weakest hunter of all mankind,
         grows stronger by the day with the supernatural powers
          he has gained.</p>
    </div>
</body>
</html>
```

@eshaaldev

CSS

```
.card {
   width: 270px; /* adjusts horizontal length */
   height: auto;  /* adjusts vertical length
   according to content */
   background-color: #6b4cb5;
   border: 1px solid #ddd; /* adds border to div */
   border-radius: 16px;
   padding: 16px; /* adds inner
   space between title content and img  */
   margin: 40px auto; /* adjusts space
   from the body in this case
   makes the div in the center  */
   overflow: hidden;
}
 img {
   width: 100%;
   height: 200px;
   border-radius: 12px;
   object-fit: cover; /* ensures the image fits within the div */
 }

 h1 {
   font-size: 22px;
   color: #ffffff;
   font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
   text-align: center;
   margin-bottom: 8px;
 }

 p {
   font-size: 16px;
   color: #f0f0f0;
   font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
   line-height: 1.5;
 }

```
