Day 7

CSS

Responsiveness

What is Responsive Design

It ensures your website adapts smoothly to all screen sizes – mobile, tablet, laptop, desktop, and even TV screens.

It improves user experience ,SEO ranking and makes the layout future proof.

Core Techniques

Flexible Grids (CSS Grid/Flexbox)

Relative Units (%, em, rem, vw, vh)

Media Queries

Breakpoints

A specific screen width where your layout or styling should change to stay usable.

📐 Common Breakpoints:

Device	Width Range (px)
Mobile	0 – 480
Tablets	481 – 768
Small Laptops	769 – 1024
Desktops	1025+

✅ Tip:

You can create your **own custom breakpoints** based on content, not devices!

@eshaaldev

Intro to Media Queries

Media queries apply CSS rules only under certain screen conditions.

```
@media (max-width: 768px) {
  body {
    background-color: lightblue;
  }
}
```

📘 **Other media features:**

- `min-width` (starts from this width **and up**)
- `max-width` (up to this width)
- `orientation` (landscape or portrait)
- `aspect-ratio`

Mobile-First Approach

Start styling for smallest devices first, then scale up.

Focus on core content
Ensures faster loads
Natural for progressive enhancement

Fluid Layouts & Units

Layouts that scale naturally based on screen size — no hard widths.

✅ Use Fluid Units:

Unit	Description
`%`	Percentage of parent
`vw`	% of viewport width
`vh`	% of viewport height
`em/rem`	Relative to font size

Tips for Responsive Design

Use flex/grid layouts

Use %/vw/rem instead of fixed px

Keep images responsive: max-width: 100%

Plan your breakpoints based on content

Overusing media queries for every little tweak

Using fixed-width elements (width: 400px)

Designing only for desktop

CSS

```
/* Base Reset */
* {
  margin: 0;
  padding: 0;
  box-sizing: border-box;
}
body {
  font-family: sans-serif;
  padding: 20px;
  background-color: #f3f3f3;
}
.profile-card {
  background-color: white;
  border-radius: 10px;
  overflow: hidden;
  display: flex;
  flex-direction: column;
  max-width: 90%;
  margin: auto;
  box-shadow: 0 4px 10px rgba(0, 0, 0, 0.1);
}
.profile-img {
  width: 100%;
  height: 250px;
  object-fit: cover;
}

.profile-info {
  padding: 20px;
}
.profile-info h2 {
  margin-bottom: 10px;
  color: #333;
}
.profile-info p {
  margin-bottom: 8px;
  line-height: 1.5;
  color: #555;
}
@media (min-width: 600px) {
  .profile-card {
```

@eshaaldev

CSS

```
@media (min-width: 600px) {
  .profile-card {
    flex-direction: row;
    max-width: 700px;
  }
  .profile-img {
    width: 40%;
    height: auto;
  }
  .profile-info {
    width: 60%;
  }
}
@media (orientation: landscape) and (max-width: 900px) {
  .profile-info {
    background-color: #eef1ff;
  }
  .profile-info p {
    color: #444;
  }
}
```
