@eshaaldev

Day 5

HTML

Lists and Tables

What are List Tags ?

These are the tags that allow you to show text in a list form.

5

@eshaaldev

Li tag

The <li> tag stands for "List Item". It is used to define individual items inside a list.

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>List Tags</title>
  </head>
  <body>
   <li>A</li>
   <li>B</li>
   <li>C</li>
  </body>
</html>
```

- A
- B
- C

@eshaaldev

Three Types of Lists

1. <ol> Ordered List
2. <ul> Unordered List
3. <dl> Description List

@eshaaldev

<ol> Tag

Used when the order of items matters (e.g., steps, instructions).

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>List Tags</title>
  </head>
  <body>
    <ol> <!--shortcut command: ol>h1>li*3 -->
    <h2>My top 3 Disney movies</h2>
    <li>Lion King</li>
    <li>Big Hero 6</li>
    <li>Inside out</li>
    <li></li>
   </ol>
  </body>
</html>
```

My top 3 Disney movies

1. Lion King
2. Big Hero 6
3. Inside out

Key Attributes

type: Type of numbering (1, A, a, I, i)

start: Starting point of the list

reversed: Reverses the order (from high to low)

@eshaaldev

<ul> Tag

Used when the order of items does not matter (e.g., shopping list).

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>List Tags</title>
  </head>
  <body>
    <ul> <!--shortcut command: ul>h1>li*3 -->
    <h2>Grocery List</h2>
    <li>Eggs</li>
    <li>Cereal</li>
    <li>Milk</li>
   </ul>
  </body>
</html>
```

Grocery List

- Eggs
- Cereal
- Milk

Key Attributes

Common list-style-type values:

disc (default)

circle

square

none (no bullets)

<dl> Tag

Used for key-value pairs (e.g., glossary, FAQs).

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>List Tags</title>
  </head>
  <body>
    <dl>
      dt>List Tags</dt>
      <dd>HTML provides several tags for creating lists.
        The most common are:</dd>
      <dt>Ordered List</dt>
      <dd>The `<ol>` tag is used to create an ordered list.
         Each item in the list is marked with the `<li>` tag.<
      <dt>Unordered List</dt>
      <dd>The `<ul>` tag is used to create an unordered list.
        Each item in the list is marked with the `<li>` tag.</
      <dt>Description List</dt>
      <dd>The `<dl>` tag is used to create a description list.
         Each item in the list is marked with the `<dt>` tag
          for the term and the `<dd>` tag
            for the description.</dd>
      <dt>Nested Lists</dt>
      <dd>Lists can be nested inside each other.
        For example, an `<ul>` can contain another
          `<ul>` or an `<ol>`.</dd>
    </dl>
  </body>
</html>
```

List Tags

HTML provides several tags for creating lists. The most common are:

Ordered List

The ol tag is used to create an ordered list. Each item in the list is marked with the li tag.

Unordered List

The ul tag is used to create an unordered list. Each item in the list is marked with the li tag.

Description List

The dl tag is used to create a description list. Each item in the list is marked with the dt tag for the term and the dd tag for the description.

Nested Lists

Lists can be nested inside each other. For example, an ul can contain another ul or an ol .

Tables

Tables are used to organize data in rows and columns.

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>List Tags</title>
  </head>
  <body>
    <table border="1" cellpadding="10" cellspacing="0" width="60%">
      <tr> Table Row
        <th rowspan="2">Name</th> // Table Heading
        <th colspan="2">Marks</th>
      </tr>
      <tr>
        <th>Math</th> Table Heading
        <th>Science</th> Table Heading
      </tr>
      <tr>
        <td>Michelle</td> Table Data
        <td>95</td>
        <td>89</td>
      </tr>
    </table>

  </body>
</html>
```

Name	Marks	
	Math	Science
Aisha	95	89

Key Attributes

Table-wide

border: Thickness of border
cellspacing: Space between cells
cellpadding: Space inside cells
width, height: Size of the table

Cell-specific:

colspan: Merge cells horizontally
rowspan:Merge cells vertically
align: Horizontal alignment (left, right, center)
valign: Vertical alignment (top, middle, bottom)
